

Maintech Adds Engineering and Logistics Office in Silicon Valley

Cranford, NJ – Tuesday, February 5, 2019

Maintech, Incorporated, a leader in providing Enterprise-wide IT Infrastructure Managed Services and Data Center Support and Management, today announces that it has added an engineering and logistics office in Santa Clara, CA to serve its growing customer base.

“With recent expansion of customer locations supported in California and the ongoing development of several new service lines; adding the facility for IT staff, field engineer offices, warehouse parts/systems storage, and lab testing purposes, made perfect sense”, stated Frank D’Alessio, President at Maintech.

Maintech has an existing office location south of Los Angeles in Garden Grove. However, the addition of the facility in Santa Clara, CA will provide for more efficient onsite response and parts availability to clients located in Silicon Valley.

Maintech is known for its world-wide data center support and enterprise-wide infrastructure managed services competencies, providing expert server-storage-network support in the US & 48 countries, as well as IT Infrastructure Managed Services solutions to some of the most respected customer brands. Maintech was named as a “Pure Play” Third Party Support Maintainer in Gartner Group recent report - a Market Guide for Data Center Maintenance.

“End-user interest, the demand for support alternatives and more flexibility in IT support services are driving growth”, stated D’Alessio. “Adding facilities to support strategic initiatives on our roadmap, and our customers expanding into new geography in the US & abroad, will continue to drive our investments” D’Alessio further stated.

Maintech continues to invest in its service delivery infrastructure as enterprise level customers look for expert professional service solutions with global coverage, and perhaps get longer life from their existing IT infrastructure.
